

Wood Receiving and Conveying

high throughput of long and short wood

Wood Infeed

for all climates and species

ANDRITZ designs and installs complete infeed systems including

- **Receiving decks with chain conveyors suitable for log bundles**
- **Slasher decks with capabilities to single out, butt and cut to length**
- **Scraper Chain conveyors to collect debris and sawdust**
- **Powerfeed infeed conveyors**

Log bundles are fed from trucks or railcars directly into the process with minimum damage to the logs.

Constant infeed capacity and debarking degree with adjustable speeds.

Reduce drum wear by washing the logs prior to drum entry.

ANDRITZ - Wood Processing - engineers advanced, wood, chip and bark processing plants and equipment for the pulp & paper, panelboard and power industries worldwide.
