

Combi-zone dryer

for extruded pellets

Combi-zone dryer

▲ Combi-zone dryer

Specifically designed for making high-quality fish feed and pet food, covering a variety of production capacities up to 30 TPH and product sizes from 0.8-40 mm

Advantages of the combi-zone dryer

- Gentle handling of products
- High energy efficiency in costs per ton
- Drying process with respect to nutritive value

- Product size range of 0.8-40 mm
- Uniform drying of each pellet
- Excellent control at every step of the drying process
- Adjustable retention time

Features

- Gentle and efficient drying
- Individual drying zones
- Temperature control in each zone (50-135° C)
- Control of drying time per deck (15-90 min.)
- Control of air flow direction for each zone
- Hygienic design with automatic cleaning system and removal of fines in each deck
- Integrated drying air system by means of direct gas-fired burners or indirect steam exchanger
- Integrated safety devices
- Easy access to operating systems for maintenance and cleaning
- Modular design for easy installation and upgrading
- Fully insulated cabinet
- Configuration flexibility available in two belt widths and with 1-4 decks
- Several accessories and options to match specific requirements
- Dryer in stainles steal as a option

Dryer type	Module dimensions mm			Total height mm (excl. supporting legs)			
Combi-zone	Width	Height	Length	One	Two	Three	Four
				deck	decks	decks	decks
CZD	4100	1250	2000	1470	2720	3970	5220
CZD/XW	5100	1250	2000	1470	2770	3970	5220

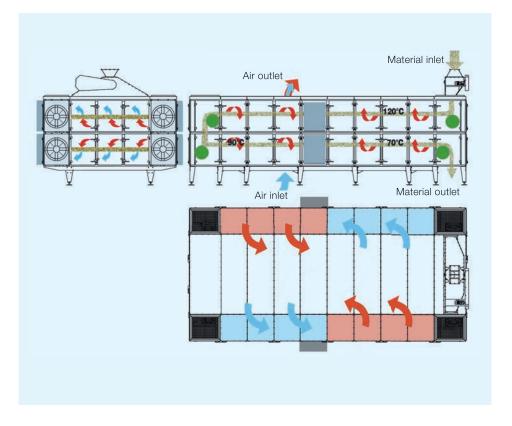

Belt width	Belt le	ngth m	Drying area
mm	Min.	Max.	m ²
1800	8	24	1.8 x belt length (m)
2800	8	24	2.8 x belt length (m)
	mm 1800	mm Min. 1800 8	mm Min. Max. 1800 8 24

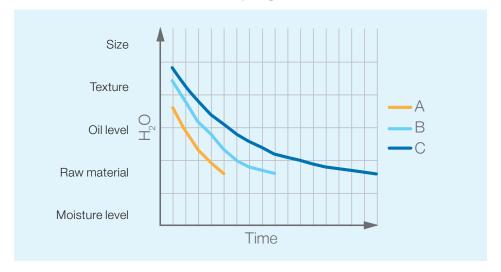

Drying process

Air system advantages

- Individual control of temperature and air flow in each drying zone
- Individual drying zones
- Control of temperature in each zone (50-135° C)
- Control of drying time per deck (15-90 min.)
- Control of air flow direction for each zone
- Optimum air cleaning possibilities by means of filter or cyclones.
- Minimized fire hazard
- Optimum flash-off for high drying efficiency
- Energy surveillance at exhaust air outlet
- Energy source based on customer requirements:
 - Indirect steam
 - Direct gas

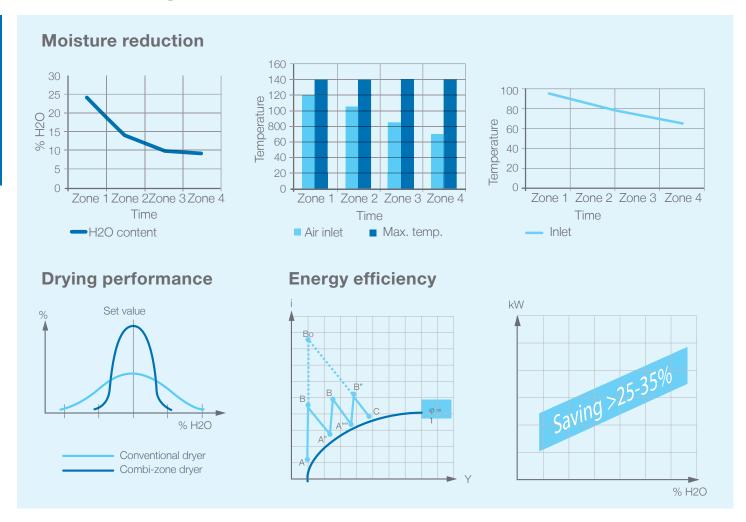

Product characteristics/drying time

Moisture reduction

and drying performance

Moisture reduction depends on

- Control of drying air temperature for each drying zone (50-135°C)
- Drying air quantity (velocity) for each drying zone
- Retention time for each deck (15-90 min.)
- Product size, expansion, and formula (especially fat and starch)
- Flexible zone division in accordance with dryer combinations

Drying performance

Minimized spread of moisture

Sinking fish feed

- Spread of moisture = spread of oil absorption
- Spread of moisture = spread of sinkability
- Too low moisture = floating

Fish feed and pet food

- Too low moisture = loss of money
- Too high moisture = risk of mold
- Too high moisture = reduced crispiness

◀ Sinking fish feed

Design details

Production of high-quality feed products

1 Inlet and outlet airlocks

- Stainless steel airlocks
- No false air at inlet/outlet
- Control of air flow and volume
- Less odor problems

2 Product distribution

- Motor-driven oscillating spreader
- Speciel server drive
- Fully adjustable system
- Completely stainless design
- Plugging detection system

 Uniform depth of pellets due to vertical distribution

3 Product depth control in all layers

- Torsion meter for product level monitoring at each deck
- Product inlet for immediate registration of product depth variations
- Product depth control for each deck

4 Chains and trays

- Large flanged rollers for safe guidance of trays and minimum chain wear and load
- Trays for optimum air distribution
- Self-supporting lamellas (tray/slats)
- Air seals in full chain and tray length

5 Trays

- Perforated trays for optimum air distribution
- Customized tray perforation

6 Plugging detector

- Built-in plugging detection
- By-outlet at each deck
- Protection of chains and trays in case of plugging

7 CIP cleaning (option)

- Air plenum cleaning system
- Collecting point
- Minimum/no cleaning

Process control systems

for all key processes in processing lines

Basic function control

Stand-alone control system

- Extruder ECPS; Extruder control panel system
- Dryer DCPS; Dryer control panel system
- Coater VCPS; Coater control panel system

Functions

- Basic functions
- Basic operation of equipment
- Manual settings/readings

▲ Touch control panel system

Extended function control

Client server-based control system

- Extruder ECMS; Extruder control management system
- Dryer DCMS; Dryer control management system
- Coater VCMS; Coater control management system

Functions

- Extended remote control
- Fully automatic control
- Total traceability

- Auto start/stop feature
- Production management
- Database
- Recipe logging
- Remote online support

- ▲ Touch client for field installation
- Server installation for control room

ECPS/ECMS	DCPS/DCMS	VCPS/VCMS

Aftermarket

After-sales service and support

■ Service and support

Our excellent aftermarket service and support is what sets us apart from our competitors. Our cooperation with our customers does not end with the sale – or the machine installation. The good customer relationship is extended through important after-sales service and support.

Our services

Our highly skilled and motivated employees stand at the ready to help you with:

- After-sales services, support, and follow-ups
- Spare and wear parts, maintenance, and repairs
- Process optimization
- Training of plant operators

Field services

We offer our customers excellent field services, where our service technicians come to you and your plant to provide assistance. The depth of experience of our field service specialists is unmatched – backed by the full knowledge and technical support that only the equipment manufacturer can provide.

Benefits

There are several benefits to be gained from continuous upgrades, optimizations, and services on your equipment:

- Maximum production
- Process knowledge and experience
- Reliability and cost efficiency
- Reduced life cycle costs
- Short and effective shutdowns
- Improved energy efficiency

Where to find us

Global supplier - local presence

ANDRITZ is truly a global organization

- but also with local presence. We are represented all over the world. The global market for feed technologies is served from five main locations:
- Esbjerg, Denmark
- Sanshui, Guangdong Province, China
- Geldrop, Netherlands
- Muncy, PA, USA
- Humenné, Slovakia

In addition, we operate from several strategic regional sales, engineering, and service locations in China, Vietnam, India, Australia, Mexico, Venezuela, Brazil, Chile, France, the UK, and Germany – and are also represented locally by agents and distributors in many other markets.
